

Mozilla Firefox 1.0

rediscover the web

Firefox 1.0 is the award-winning Web browser from the Mozilla Foundation that's fast, secure, and easy to use. Innovative new features include: enhanced privacy controls, pop-up blocking, tabbed browsing, integrated Google search, live bookmarks, and over 100 different extensions to make Firefox even more powerful. It's available for Windows, Mac OS X, Linux and many different languages.

Rediscover the Web

Firefox is free from hidden spyware and annoying pop-ups. With Firefox, surfing the Web is fun again.

Firefox's pop-up blocker notifies you when pop-ups are blocked and also gives you the option to view the blocked pop-up.

Search is integrated into the toolbar so search from your favorite sites, like Google, Yahoo, Amazon, Dictionary.com, and more — is right at your fingertips.

Surf the Web Faster in Every Way

Firefox is built on top of the powerful Gecko rendering engine so pages load quickly and accurately.

Tab browsing will change the way you use the Web by allowing you to open links on a page in the background. When you are ready to read the next page, you can quickly flip to it — perfect for reading the news.

Live Bookmarks

Live bookmarks is a new technology in Firefox that lets you view RSS news and blog headlines in the bookmarks toolbar or bookmarks menu. With one glance, quickly see the latest headlines from your favorite sites. Go directly to the articles that interest you — saving you time. You can even use live bookmarks to share your favorite bookmarks with friends or co-workers, or access them from your work and home computer.

“I’ve been using Firefox for a week now, and I’ve all but forgotten about Explorer.”

Are the Browser Wars Back? How Mozilla's Firefox trumps Internet Explorer, [MSN Slate](#), June 30, 2004

“Mozilla Firefox — my favorite browser in Windows on account of its pop-up blocking, tabbed browsing, and clean, elegant interface”

[Washington Post](#), June 21, 2004

The Browser You Can Trust

Firefox is the browser you can trust for your most important transactions when shopping, trading stocks, or banking online. Firefox uses high grade security and anti-spoofing measures to protect you and your data. The Firefox team is committed to your safety and security on the Internet.

Unlimited Features

Firefox's extension capability allows you to add as many features to the browser as you want. Over 100 extensions are available including a Google toolbar, ad blockers, and web developer tools. Find them all at <http://update.mozilla.org>.

Easy to Switch to Firefox

Switching to Firefox is quick and easy. Firefox is a small download, only 4.5MB on Windows and downloads in minutes. An import wizard gets your bookmarks, settings, and other information from older browsers like Internet Explorer, Netscape, and Mozilla 1.x.

Developer's Best Friend

Firefox leads the industry in support for Web standards. A simplified interface, cross-platform support, open source collaboration, and developer extensions, make Firefox the perfect canvas for your web site or web application.

Absolutely Free

Best of all, Firefox is free. Free to use, free to download, and free for you to enjoy. <http://GetFirefox.com>

Mozilla Firefox 1.0

Key Features:

- High grade security
- Anti-spoofing protection
- Privacy controls
- Tabbed browsing
